

PURE SIGNAL™ COMMAND

The advantage is access. The outcome is time.

Most security tools give teams another place to work. Team Cymru gives defenders access to what they cannot see on their own: internet-scale visibility, network-derived intelligence, global partnerships, and defender-led expertise built over more than two decades. Pure Signal™ Command is how teams put that access to work when time matters most.

THE VALUE IS ACCESS

Team Cymru is the solution. Command is how defenders use it.

The value is not the interface alone. It is access to visibility security teams cannot build on their own.

AI TOOLING & ENABLEMENT

Access extends beyond the analyst. It reaches the agents too.

Through an MCP server, APIs, and native integrations, Team Cymru intelligence flows directly into automations and AI agents, so workflows act on trusted visibility instead of weaker signal.

FROM ACCESS TO ACTION

How access becomes operational advantage.

Saved Time → Better Decisions → Better Outcomes

Access creates visibility. Visibility creates time. Time changes outcomes.

Not short on tools. Short on **usable visibility**.

Five gaps that leave defenders reacting instead of anticipating.

01

Activity forms beyond the perimeter, unseen

02

Indicators arrive without infrastructure context

03

Intelligence is scattered across disconnected tools

04

AI & automation lack trusted intelligence access

05

Decisions land after the advantage is gone

THE INFRASTRUCTURE THAT SOLVES IT

One foundation · multiple ways to engage

Threat-intel feeds & APIs

BUILT FOR THE TEAMS THAT DEFEND

CISO & Security Leadership

More defensible decisions around exposure, escalation, and investment, with board-ready reporting.

Threat Intelligence & Hunting

Faster movement from indicator to adversary-infrastructure understanding, with deeper pivots.

SOC & Incident Response

Less time chasing weak signals; more confidence escalating what matters, with context on every alert.

AI / Automation Teams

Structured Team Cymru intelligence available where automated and agentic work happens.

MORE TIME TO CHANGE WHAT HAPPENS NEXT

See Team Cymru visibility work through Pure Signal™ Command.

Put access to work earlier in the lifecycle of a vulnerability or threat. Before infrastructure becomes impact, and before uncertainty becomes delay.
